1 Introduction

Infomedia is committed to comply with privacy and data privacy protection laws in all jurisdictions where it has a business presence.

Ensuring data privacy protection is the foundation of trust and maintaining the reputation of the Infomedia Group in all its commercial relationships.

This Guide has been prepared to provide customers and suppliers details of how Infomedia complies with the data protection laws prescribed by the European Union Data Protection Regulation Directive (GDPR) and the European Economic Area (EEA).

It also applies to our compliance program with other privacy and data protection laws not limited to such as Australian Privacy Act, United States privacy laws including the California Consumer Privacy Act and the UK Data Protection Act.

2 Document Purpose

The purpose of this document is to set out Infomedia's guide to how Infomedia complies with privacy laws worldwide that impact Infomedia's operations and applications used by our customers.

It is supported by Infomedia's privacy policy which can be found at www.infomedia.com.au/privacy.

3 Summary of GDPR

The European Union's Data Protection Directive 95/46/EC, adopted in 1995, regulates the protection of individuals with regards to the processing of personal data and the free movement of such data.

The European Union Commission has issued updated privacy laws commonly referred to as General Data Protection Regulations (or GDPR) and which took effect on 25th May 2018.

Further information on GDPR can be found on the EU GDPR Portal at <http://www.eugdpr.org/>

The aim of the GDPR is to protect all EU citizens from privacy and data breaches in an increasingly data-driven world.

Below are some common definitions used by the GDPR and in this document:

"Personal Identifiable Information" (PII) means any information relating to an identified or identifiable natural person ('Data Subject'); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

"Data Controller" means the natural or legal person, public authority, agency or other body which, alone or jointly with others, determines the purpose means of the processing of PII. In most cases the party initially collecting the PII is the Data Controller. They are the party that needs to "control" the use and security of PII, need to obtain consent for its collection and use and is primarily liable for data breaches.

"Data Processor" means the natural or legal person, public authority, agency or other body which processes PII on behalf of the Data Controller. Processing means any operation or set of operations which is performed on PII or on sets of PII, whether or not by automated means.

With some exceptions, processing of PII is only lawful if the Data Subject has given consent to the processing of his or her personal data for one or more specific purposes.

The Data Subject has the right to request the Data Controller to erase PII concerning him or her without undue delay (right to be forgotten).

The GDPR apply to all companies processing PII of Data Subjects residing in the European Union, regardless of the company's location. The GDPR also applies to the processing of PII of Data Subjects in the EU by a Data Controller or Data Processor not established in the EU (eg. such as in the USA or Australia), where the activities relate to offering goods or services to EU citizens.

We have assessed that the GDPR applies to Infomedia as a Data Processor of PII on behalf of our customers (such as automotive dealers and OEM's) who use our applications as part of their business and as a Data Controller for customer PII we collect ourselves and store and process in our sales, marketing and internal operational systems.

4 US Privacy Shield

The United States has, as part of negotiations and agreement with the EU, established a Privacy Shield framework to allow US based companies who sign up with the Privacy Shield to comply with the GDPR and transfer Personal Identifiable Information (or PII) from the EU to the USA.

This replaced the former Safe Harbour framework which the EU Commission held in 2015 was held to be inadequate the Court of Justice of the European Union.

See <https://www.privacyshield.gov>

On July 12, 2016, the European Commission deemed the EU-U.S. Privacy Shield Framework adequate to enable data transfers under EU law.

On January 12, 2017, the Swiss Government announced the approval of the Swiss-U.S. Privacy Shield Framework as a valid legal mechanism to comply with Swiss requirements when transferring personal data from Switzerland to the United States.

On July 16, 2020, the Court of Justice of the European Union issued a judgment declaring as "invalid" the European Commission's Decision (EU) 2016/1250 of 12 July 2016 on the adequacy of the protection provided by the EU-U.S. Privacy Shield. As a result of that decision, the EU-U.S. Privacy Shield Framework is no longer a valid mechanism to comply with EU data protection requirements when transferring personal data from the European Union to the United States. This decision does not relieve participants in the EU-U.S. Privacy Shield of their obligations under the EU-U.S. Privacy Shield Framework.

The U.S. Department of Commerce will continue to administer the Privacy Shield program, including processing submissions for self-certification and re-certification to the Privacy Shield Frameworks and maintaining the Privacy Shield List.

Infomedia was certified under the US Privacy Shield but withdrew in October 2020. Infomedia will rely on the intercompany data protection agreement to transfer data between its subsidiaries.

5 Infomedia Privacy Policy

The Infomedia Privacy Policy explains how and why Infomedia collects personal information, how it is used, and what controls a Data Subject has over Infomedia's use of it.

Infomedia is committed to complying with applicable laws governing the collection and use of personal information and to protecting and safeguarding a Data Subject's privacy when that person deals with us.

The Infomedia privacy policy can be found on at www.infomedia.com.au/privacy

6 Data Security and Protection

Infomedia has adopted the ISO27001 framework standard as the basis for its data security procedures and processes.

Infomedia is certified to ISO 27001 by Best Practice Certification Pty. Ltd Certificate Number 63003326431 expiry 07/08/2021

Infomedia, as a Data Processor, when processing PII on behalf of a Data Controller in connection with services provided by Infomedia, has implemented and maintains the following technical and organizational security measures for the processing of such PII:

- 1. Physical Access Controls:** Infomedia has implemented reasonable measures to prevent physical access, such as secured buildings and access controls within premises, to prevent unauthorized persons from gaining access to PII, and ensure Third Parties such as those operating data centres are also adhering to such controls.
- 2. System Access Controls:** Infomedia has implemented reasonable measures to prevent PII from being used without authorization. These controls vary based on the nature of the Processing undertaken and may include, among other controls, authentication via passwords and/or two-factor authentication, documented authorization processes, documented change management processes and/or, logging of access on several levels.
- 3. Data Access Controls:** Infomedia has implemented reasonable measures to ensure that PII is accessible and manageable only by properly authorized staff, direct database query access is restricted and application access rights are established and enforced to ensure that persons entitled to use a data processing system only have access to the PII to which they have privilege of access; and, that PII cannot be read, copied, modified or removed without authorization in the course of Processing.
- 4. Transmission Controls:** Infomedia has implemented reasonable measures to ensure that it is possible to check and establish to which entities the transfer of PII is made by means of data transmission facilities so PII cannot be read, copied, modified or removed without authorization during electronic transmission or transport.
- 5. Input Controls:** Infomedia has implemented reasonable measures to allow it to check and establish whether and by whom PII has been entered into data processing systems, modified or removed and to ensure that (i) PII is under the control of Data Controller; and (ii) PII is managed by secured transmission from Data Controller.
- 6. Data Backup and retention:** Infomedia has implemented measures to ensure that back-ups of relevant databases are taken on a regular basis, are secured to ensure that PII is protected against accidental destruction or loss. PII will be securely deleted or erased when it is no longer needed for a permitted business purpose.
- 7. Logical Separation:** Infomedia has implemented measures to ensure that PII from different Infomedia subscriber environments is logically segregated on its systems to ensure that PII that is collected for different purposes is processed separately.

7 Infomedia Compliance with Privacy Laws, including GDPR

Infomedia has set in place a program and policies to ensure that it will comply with the privacy laws worldwide, including the GDPR.

The details are set out in the table below to help demonstrates how Infomedia complies with privacy laws:

Privacy Law Requirement	Infomedia Compliance
Consent	<p><i>Infomedia as the data controller:</i></p> <p>Infomedia obtains consent to capture and process PII as part of the initial collection process and only processes PII for the purposes covered by the consent and according to our privacy policy.</p> <p><i>Infomedia as the data processor:</i></p> <p>It is the responsibility of the Data Controller (eg. dealer or OEM who collects the customer PII) to obtain consent. The Data Controller needs to ensure that they have consent for any PII they collect, enter or transfer into Infomedia’s applications (as Data Processor). This obligation is included in Infomedia’s contracts. Infomedia processes and stores PII according to GDPR requirements as a data processor.</p>
Data security and protection	<p>Infomedia has adopted the ISO27001 standard as the basis for its data security procedures and processes.</p> <p>ISO27001 is an information security standard that is published by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) under the joint ISO and IEC subcommittee. It is an internationally recognised standard for the specification of an information security management system (ISMS).</p> <p>Adoption of this standard ensures that security and protection is part of our systems by design and by default.</p>
Location of PII data storage for customer applications	<p>Infomedia stores PII processed by our applications using Amazon Web Services (AWS) infrastructure.</p> <p>Subject to the terms of our customer agreements, PII is collected for processing as follows</p> <ul style="list-style-type: none"> a) From our EU customers will be stored in the EEA, in an adequate jurisdiction (as defined by the EU under the GDPR) including in the USA as envisaged under the Intercompany Data Processing Agreement. b) For US and Canada customers, in the USA c) Elsewhere in the world, in either of the above locations or in Australia
Data Processing Agreement (DPA)	<p>A DPA allows the data subject of the PII to obtain recourse from the data processor should there be a breach of PII data security.</p>

	<p>Infomedia has developed a proforma Data Processing Agreement (DPA) for our customers to sign as required by the GDPR. The DPA is based on and adopts the 'Model Clauses' approved by the EU.</p> <p>A template of the DPA is available at http://www.infomedia.com.au/gdpr/</p>
Data Protection Officer	<p>Privacy Laws in general require Infomedia to appoint a Data Protection Officer (DPO) or similar to be involved properly and in a timely manner in all issues which relate to the protection of personal data.</p> <p>Infomedia has appointed Mark Grodzicky, our General Counsel, to this position. He reports directly to our CEO and can be contacted by email at privacy@infomedia.com.au</p>
Special categories of personal data	<p>Privacy laws in general mandate greater security and controls when processing of certain special categories of PII, such as financial and health data.</p> <p>Infomedia does not currently and does not plan to collect or process special category PII.</p> <p>Infomedia does collect credit card details in a limited number of circumstances and may use third party payment gateways such as PayPal to allow customer to make credit card payments.</p>
Support systems, email, chat and instant messages	<p>Information sent to Infomedia or entered into Infomedia support systems and applications may be transferred outside of the original country, as we use Microsoft 365 Office and other cloud based solutions.</p> <p>Data Controllers wanting to send PII data or entering PII data into these Infomedia support systems is responsible for ensuring that they have the necessary consent of the Data Subject to provide the PII, that it is secure in transmission and if required, enters into a DPA with Infomedia.</p>
Right to access	<p>Each Data Controller can access and modify, including deletion, of PII that it has entered into the relevant Infomedia applications via the application interface.</p> <p>Due to its nature, Infomedia has assessed the likelihood of requests to access the PII stored by Infomedia as a Data Controller as low.</p> <p>The same assessment applies to PII stored by Infomedia as a Data Processor in our applications by our customers.</p> <p>Should we receive a request as Data Processor to identify right to access PII, we can provide a quote, subject to verification of the Data Subject, such PII on a case by case basis.</p>
Data portability	<p>Each Data Controller can access and modify, including export, of PII that it has entered into the relevant Infomedia applications via the application interface.</p> <p>Due to its nature, Infomedia has assessed the likelihood of requests to port PII we store as Data Controller as low.</p>

	<p>The same assessment applies to PII stored by Infomedia as a Data Processor in our applications by our customers.</p> <p>Should we receive a request to as Data Processor to port PII, we can provide a quote, subject to verification of the Data Subject, to port PII data in an agreed format on a case by case basis.</p>
Right to be forgotten	<p>Each Data Controller can access and modify, including deletion, of PII that it has entered into the relevant Infomedia applications via the application interface.</p> <p>Due to its nature, Infomedia has assessed the likelihood of requests to erase PII we store as a Data Controller as low.</p> <p>The same assessment applies to PII stored by Infomedia as a Data Processor in our applications by our customers.</p> <p>Should we receive a request as the Data Processor for PII to be erased, we can provide a quote, subject to the verification of the Data Subject, to erase such PII on a case by case basis.</p>
Breach notification	<p>Infomedia will comply with the privacy law breach notifications, including the requirements in Article 33 of the GDPR.</p> <p>In general these require that a personal data breach must be reported unless the personal data breach is unlikely to result in a risk to the rights and freedoms of natural persons or cause serious harm.</p>
Staff and contractor training	<p>Infomedia has implemented a mandatory on-line training program to ensure all staff and contractors are trained in privacy and information security.</p>
Retention of data	<p>As applications in general provided by Infomedia are tools to be used by Data Controllers, Infomedia does not currently set any time period limits to retention of PII as this remains the responsibility of the Data Controller.</p> <p>Each Data Controller can access and modify, including deletion, of PII that it has entered into the relevant Infomedia applications via the application interface.</p>

8 Third party Processors and GDPR

3 rd party suppliers	<p>Infomedia uses 3rd party suppliers as Data Processors to provide us with hosting, processing, applications and other services used to provide the Infomedia application and process PII, including AWS, Zendesk, Microsoft, Auth0 and Netsuite (part of Oracle).</p> <p>Infomedia has signed DPAs with these data processors and is satisfied that these suppliers provide adequate protection under GDPR for PII. Copies of those agreement are available at http://www.infomedia.com.au/gdpr/</p>
