

Precision and efficiency for digital service quotations.

Deliver fast, accurate and price-transparent service quotes in an instant.

What is Superservice Menus (SSM)?

Superservice Menus is a digital service quoting tool with a difference. It's a data-driven solution that's designed to enhance the efficiency and profitability of your service operations. It helps build better customer relationships and grow parts & labor sales.

How can Superservice Menus improve my customer experience and workshop efficiency?

With a focus on trust through transparency, Superservice Menus uses VIN-specific, genuine OEM data to create personalised, price transparent and on-brand service quotations for car owners – in just three simple clicks.

A digital-first workflow: Say goodbye to pens & paper, SSM digital service quotations can be created quickly on any device & easily shared with customers.

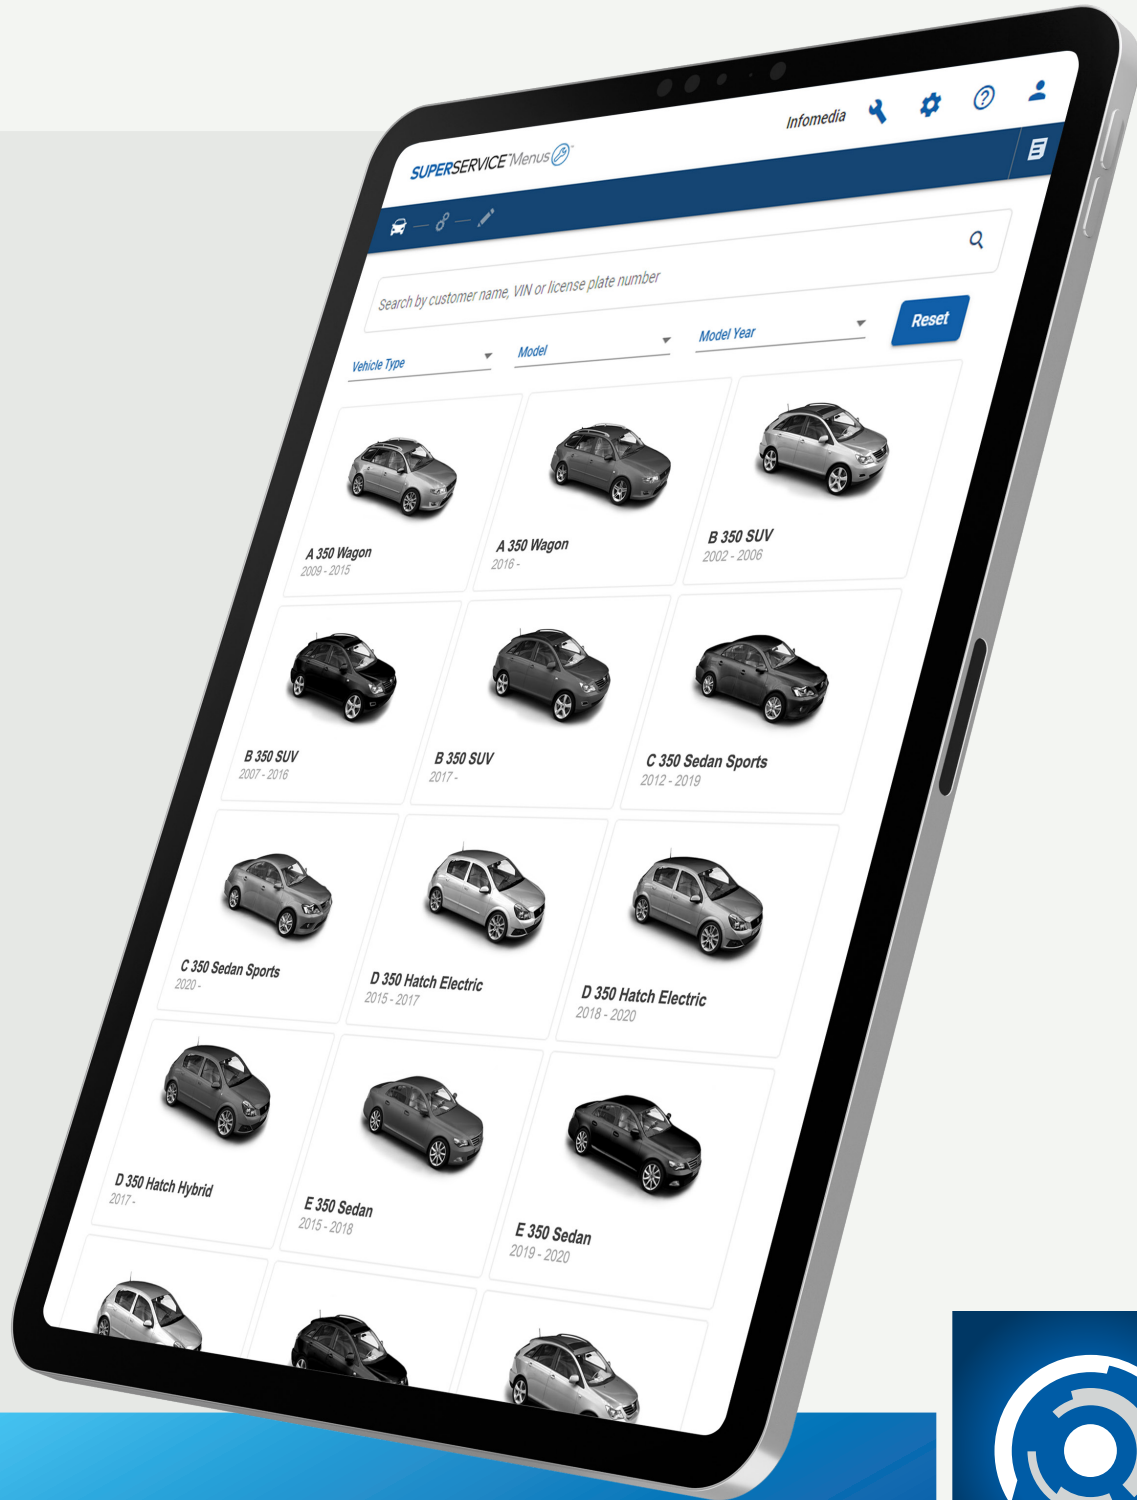

Customer trust & transparency: Quote values match service invoice details, clearly managing cost expectations and providing a transparent breakdown of work required.

A professional brand image: All service quotes are formatted in a consistent and professional layout, that is compliant with your brand guidelines.

Accurate quotes – every time: Genuine OEM parts & labor data is fully integrated into SSM, ensuring that every line item on the quote is accurately priced.

Always up to date: The latest OEM data is always available and automatically updated, making sure your workshop teams can quote with confidence.

Seamless integration with approved third-party solutions: Save time by no longer rekeying data between systems or changing applications to complete a workflow.

Ready to get started?

Then we'd love to hear from you.

Superservice Menus is an invaluable tool used by Service teams in over 180 countries. If you'd like to find out more about how we could help your workshop teams too, please contact start@superservice.com.
