

## DMSi INSTALLATION GUIDE

Microcat has the ability to integrate with your Dealer Management System (DMS) using the Infomedica DMSi application. Transferring parts directly to your DMS saves time, reduces errors and streamlines operations within your dealership.

### Install the DMSi application

The Infomedica DMSi must be installed and configured to enable the integration between Infomedica products and the DMS. When you install the Infomedica DMSi 8, all previous DMSi settings will be retained.

The Infomedica DMSi requires the Microsoft .NET Framework (latest version) and will automatically include the Microsoft .NET Framework in the DMSi installation, if required.

#### To install the Infomedica DMSi:

- 1 Go to this website: <https://dmsi.autopartsbridge.com/ui/DMSi/publish.htm>.
- 2 Select the language from the drop-down and click **Install**.  
The Infomedica DMSi application will be downloaded.
- 3 Click the DMSi file to open it and start the installation.
- 4 Click **Install**.  
The installation may take several minutes.
- 5 When prompted, enter your user name and password.  
Use the same login credentials that you use to log into Microcat EPC.
- 6 Click the **Save login details** checkbox and click **OK**.

- ▶ To check your DMSi settings at any time, right-click the Infomedica DMSi  icon on your Windows taskbar and select **Settings**.

## Set up the DMSi integration in Microcat EPC

Once the DMSi is installed, you need to check and configure the DMSi settings within Microcat EPC.

New and previous DMSi connections will be displayed in the Available Connections drop-down in the Integration tab of the Settings window. You must confirm the required connection is selected.

To set up the DMSi integration within Microcat EPC:

- 1 Access Microcat EPC, click the  icon and select **Settings**.
- 2 Select the **Integration** tab and view your DMSi Integration settings.
- 3 Click the **New DMSi Application** icon  to activate the new DMSi.
- 4 Select your DMS connection from the **Available Connections** drop-down.

If you have multiple DMS connections, you must select the required connection.

If your connection is not listed, click **Advanced** and enter your DMSi name, then click **OK**.

You can copy your DMSi name from the **Integration Settings** screen in the DMSi application.

- 5 Close the Settings window.
  - 6 Click the DMSi icon  to ensure a successful connection with the DMSi .
- You are now ready to transfer parts to your DMS.
