

IMPROVE YOUR EFFICIENCY WITH DMS TRANSFER

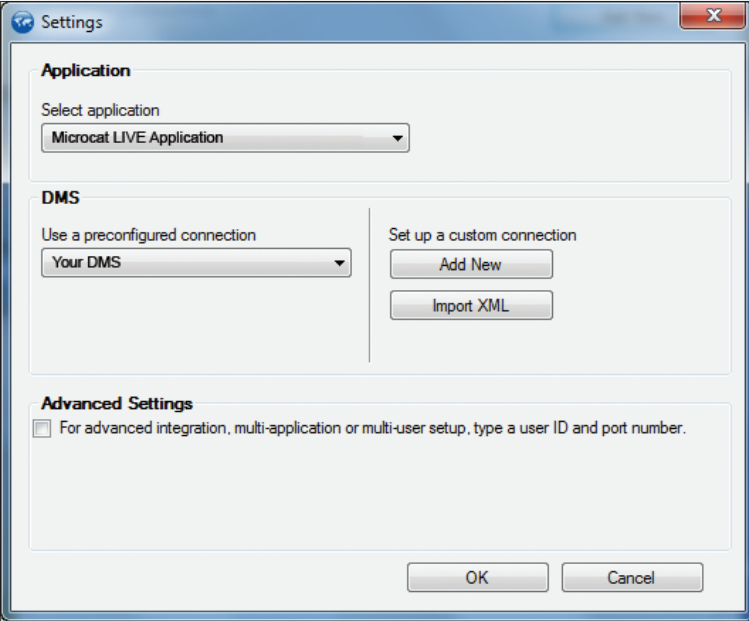

The Microcat Live EPC integrates with your Dealer Management System (DMS) using the Infomedia DMSi application. Transferring parts directly to your DMS saves time, reduces errors and streamlines operations within your dealership.

①  DMSi

③ 

④ 

⑤ 

⑥ 

①	Download the DMSi installer from the Landing Page, then extract the installation package. Double click the DMSiSetup.exe and follow the installation steps.
②	Double click the Infomedia DMSi icon and click Add New .
③	Select the Microcat Live application.
④	Select the preconfigured connection for your DMS.
⑤	Click OK .
⑥	In Microcat Live, click the DMS icon in the DMS status bar to activate the connection. If the DMS icon remains red, restart the PC.

Installing the DMSi requires 10MB of hard drive space and installation of the Microsoft.NET Framework. For more information, refer to the DMS Integration Guide accessible from the settings icon.
