

## MICROCAT PARTSBRIDGE JUST GOT A WHOLE LOT BETTER

We're excited to share some cool, new features in Microcat Partsbridge that will help you:

- sign up more body shops
- expand your network of body shops
- increase parts sales with your existing body shops

### ✓ DEALER INITIATED ORDERING PROCESS

Recapture sales from the aftermarket by offering an easier parts ordering process for your body shop customers!

You can now manage the entire electronic parts ordering process for your main customers. All they have to do is complete a simple, one-time setup (supported by our Partsbridge team) and provide you with a VIN or estimate number!

The best part is, you can sell more parts with factory program rebate support with no need for a manual claim process. No records to keep, no claims to file, no data entry – just the same quick and easy Microcat Partsbridge you use today!

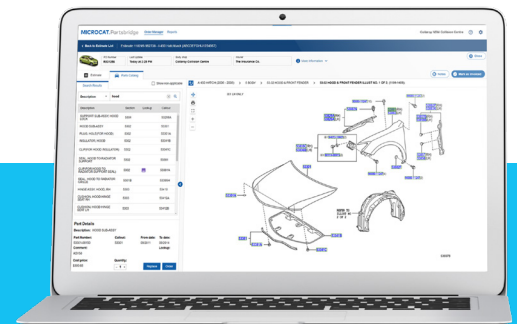

### ✓ SUPPLEMENTAL ORDERS

Microcat Partsbridge now makes it easier to quickly import your customers' latest supplements and add more parts to the order.

Better yet, with the Dealer Initiated Order Process, you can add supplements for them. Easily retrieve and submit the supplemental part, along with a rebate claim, with just a couple of clicks!

We hope you enjoy the latest version of Microcat Partsbridge!
